J D , MPA

Software Engineer Intern, CodeDay
Seattle, Washington, United States

Summary

: I am seeking an exciting opportunity for a Data Analyst/ Management System Analyst Position. I am a self-motivated individual who enjoys working with relational databases experienced using SQL to query data. My skills as a strong problem solver and logical thinker attributes to detail and process development applying statistical analysis methods like linear regression, forecasting, and clustering methods using Tableau plus Visio with Power BI as visual app aids.

Experience

CodeDay

Software Engineer Intern

June 2023 - Present (3 months)

Job duties as a software engineer intern include tasks like coding and debugging software applications and experimenting with design elements. Review other engineers' code, test software applications and patches, and implement changes and updates when necessary. Knowledgeable hard skills as a software engineering intern coding languages such as Python, Java, Web Development, C++, and familiarity with software such as Linux, Windows, and Cloud technology. Other skills include analysis skills, communication, data collection, and network & server administration hardware engineering, and JavaScript. Software engineers work on a larger scale to design, develop, and test entire computer systems and application software for a company or organization.
